

Why 'Thrive' at Hexthorpe?

Who is it for?

At Hexthorpe Primary School we use a tool called Thrive-Online to support **all** of our pupils grow, learn and flourish.

The Thrive Approach has been developed over many years by a team of experts in the field of social and emotional education.

“It supports all children’s emotional and social development and enables them to feel happy and secure, enables them to enjoy friendships, relate well to others and be ready and able to learn.”

Thrive is a specific way of working with children that helps to develop their social and emotional well-being, creating self-assured, capable and adaptable children, ready for learning and growing up.

Hexthorpe Primary School and the Thrive Approach

Hexthorpe Primary School use the Thrive approach and have used it successfully for a number of years. As a school, we value the positive impact that using the Thrive approach has on our children.

What about my child?

We use the Thrive assessment tool to generate bespoke, whole class emotional and personal education plans. These plans fit together with the school’s PSHCE curriculum and help to provide a personalised approach when contributing to our school ethos.

On an individual basis, we may identify that your child could benefit from small group or individual work with our licensed Thrive Practitioners Mrs Garbett or Mrs Higham.

In these cases, you will be contacted either by the practitioners or by your child’s class teacher and asked for consent for your child to access personalised support.

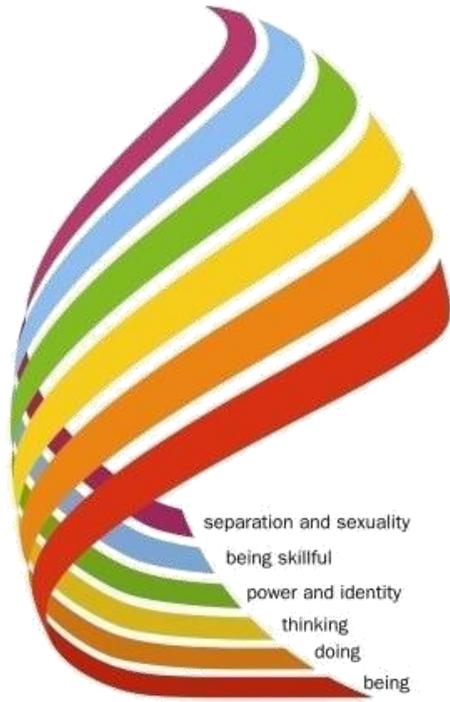

Thrive is appropriate for all children from birth to adulthood. Everyone can experience gaps in their emotional development and Thrive provides a comprehensive online-tool to establish what support individuals need to be able to flourish socially and emotionally.

Having created a plan, Mrs Garbett will explain what support your child is receiving and ways in which you can help at home.

Thrive works best when there is open dialogue between home and school and both settings use consistent strategies to develop emotional wellbeing. If you have concerns about your child’s emotional well-being, for example following a bereavement, please do contact us about the support we can offer. We can create action plans for you to do at home with your child.

If you are interested in finding out more, please contact Mrs Garbett via the school office.

“What does it take to develop healthy, happy, confident children who are ready and open to learning? Recent advances in neuroscience, attachment theory and child development have provided some of the answers to this question. The Thrive Approach draws on insights from these fields to provide a powerful way of working with children and young people that supports optimal social and emotional development. In particular, the Approach equips you to work in a targeted way with children and young people who have struggled with difficult life events to help them re-engage with life and learning.”
